HCUMR-903 SMART Features

The KUMR-903 is a Universal Motion Remote with a motion sensor, programmable for unparalleled energy savings up to 60% in the operation of any air-conditioning system that incorporates a built-in remote control receiver. It is capable of operating over 6,000 different brands and models of air-conditioners.

KUMR-903 can detect human motion within 25-foot radius and control the operation of an air-conditioner according to the presence of human motion and can be programmed to turn the air-conditioner off completely or have the setting temperature increased to a desired setting for incredible energy savings.

KUMR-903's default mode would be ECO mode, which adjusts room temperature based on occupancy and temperature / time settings.

KUMR-903 besides being a Universal Motion Remote, can also be used as a night lamp where the LCD screen will light up upon detecting motion in the given room. After a period of time, the LCD screen will turn back off automatically.

KUMR-903 can function as a thermometer, hygrometer and also as a time clock with a timer on / off function.

KUMR-903 can be used as a wall thermostat fixed on a wall or, with its adjustable bracket, can be set on a table or desk for outstanding convenience.

KUMR-903 can be set up and installed in under 5 minutes with no power or control wiring required.
