

NU-FLAME LIGHTER INSTUCTIONS

Filling and re-filling lighters:

- Lighter contains inflammable gas under pressure. Handle carefully.
- Ensure that flame is extinguished before attempting to fill.
- Never attempt to ignite lighter while refilling.
- Read butane canister warning labels.
- Only refill lighter in a well-ventilated area.
- Hold lighter away from face and clothing while filling lighter.
- Never fill lighter around any heat source, sparks or flame.
- Triple refined premium butane is highly recommended, as lower quality butane has been known to clog lighters.

KEEP OUT OF REACH FROM CHILDREN

Adjusting Flame Height:

- Turn the fuel adjustment screw on the bottom of the lighter towards the (+) mark to increase the flame or turn the screw towards the (-) to decrease the flame to achieve a desired height.
