

# Ventilating Dehumidifier DV098

# CLEAN COMFORT™ INDOOR AIR ESSENTIALS

The Clean Comfort™ DV098 is a whole-house ventilating dehumidifier designed to remove up to 98 pints of water per day while providing effective filtration (MERV 11) of the air passing through the dehumidifier.

The DV098 is suited for homes up to 2,300 sq. ft., and can be used in three different configurations:

- Connected directly to a home's forced air HVAC system,
- Installed with dedicated ducting, or
- Operated as a freestanding appliance.

When used with a Clean Comfort DVP Series multifunction control, the DV098 can work with mechanical ventilation to bring fresh air into the home according to a user-programmed schedule.

The DV098 features a well-insulated, compact horizontal cabinet for quiet operation and installation flexibility. It can be installed in mechanical rooms, closets, attics, basements and crawlspaces.

When connected to a home's HVAC ductwork, the Clean Comfort DV098 dehumidifier helps control humidity levels to a comfortable level throughout the whole home, compared to portable dehumidifiers that only dehumidify the area close to where they're located.
